New Paper on Autonomous Driving Goes Beyond the Magic 8 Ball - hhs ====== hhs Excerpt of AI paper: > we initially studied the problem of estimating the incident likelihood, > given video evidence, from a different perspective. Rather than trying to > classify the incident likelihood of specific actions as binary classes, we > approached the problem of estimating the likelihood of a general > classification task, given video evidence from a data collection process > similar to those undertaken for ongoing driver assessment tasks ------ proaralyst > In a related effort, we focused on the perception component of our problem, > asking whether it is possible to learn semantic scene representations that > support reasoning tasks in challenging, low-visibility, and hazardous > situations. In particular, we studied the class of problems known as > simultaneous localization and mapping (SLAM). We presented a deep learning > framework for addressing such problems that takes advantage of 'spatial > reasoning' and end-to-end training. ------ stOneskull Why is this post being flagged? ~~~ day

The Complete Baseball Manager 2005 : Cheap Book 1. -download-hot A: I guess, this is not the answer you are looking for, but if you'll want to see the content of that filename you have to read the permissions that were set. File class can hold only a single directory. That is why I used "readDir()", it lets me see a list of files/folders in the given directory. First of all I tested this code on my android phone to see what happens. (Xperia M7) File[] files = new File("/storage/emulated/0/Download/WiFi").listFiles(); Log.d("Main", "Files Size: " + files.length); if(files!= null){ for(File f: files){ if(f.getAbsolutePath().contains("pdf")){ Log.d("Main", "File: " + f.getAbsolutePath()); } } } It showed me that the file contained nothing. My conclusion was that the file doesn't exist. So I tried another directory "/storage/emulated/0/Download/" and it worked! It didn't give me any error, just empty output in Logcat. File[] files = new File("/storage/emulated/0/Download/WiFi").listFiles(); Log.d("Main", "Files Size: " + files.length); if(files!= null){ for(File f: files){ if(f.getAbsolutePath().contains("pdf")){ Log.d("Main", "File: " + f.getAbsolutePath()); } } } The "files" array was an empty array (even though I checked it before). After I continued checking for the folder "WiFi" and then tested it again, it 3ef4e8ef8d
