Embedding a debugger in IDA Pro is an easy to implement task and gives the IDA Pro user the ability to analyse and debug.. To add a new plug-in, you need to:.The present invention relates to an X-ray fluorescence analyzer which analyzes a sample by irradiating the sample with X-rays and detecting X-rays which have been emitted from the sample, and more particularly relates to a technique of making spectra analysis of plural types of samples. An X-ray fluorescence

analyzer is a device in which a sample is irradiated with X-rays while changing the intensity of the X-rays, or that in which plural irradiating conditions of X-rays are set and a sample is irradiated with X-rays under these irradiating conditions, and a spectrum is obtained from emission intensity of X-rays of the sample to be analyzed, and that obtained spectrum is compared with a spectrum prepared in advance to analyze the sample. The above-mentioned X-ray fluorescence analyzer is used in order to analyze a trace element contained in a sample by means of X-ray fluorescence analysis. An operator of the X-ray fluorescence analyzer manually performs 3ef4e8ef8d
