This is a website which gets Your IP Address, converts it to its address in latin, and gives a reverse lookup where it tells you the country you are located in. This is something which is not found on any other website. It is a free website, and so you do not have to register. There is no login system. The only requirement to use it is that you have to be able to view web pages. This website works in this manner: 1. The IPs are added to the database, so the more IPs there are, the better the database. 2. The data in the database is then queried through the site by IP address, giving the latin equivalent. 3. This gives you the option of viewing a latin address or converting it to an english address. 4. If you convert a latin address to an english address, the website will query the reverse address database and give you the country you are located in. Once you have created an account you can login, then add your own IP addresses, and they will be added to the database, and all of your IP addresses will be saved. Just go to the search page, input your IP address. Then scroll down to the bottom of the page and click submit. This will bring up the results page. The IPs are listed alphabetically. Just click on the IP Address you wish to view and it will bring up the IP History page, and all IPs that you have ever connected to the internet can be viewed here. This is a website which gets Your IP
