While many of the core problems are the same across document types and formats, the available solutions vary. This is especially true for the handling of presentation and data, as they often involve different presentation states and presentation requirements. In this course, you'll learn how to combine different presentation solutions and build presentations in your own projects. Learn by creating a project using Microsoft Word, PowerPoint, and Excel. As a bonus, take our survey to see which presentation techniques work best for you. Enrollment includes access to all course content, including a first release of sample content.
