A fun way to backup music, movies, games, software.Â .The present invention relates to an abnormality diagnosis system for diagnosing an abnormality of a rotating electrical machine, and particularly to an abnormality diagnosis system for diagnosing a failure of a stator winding of the rotating electrical machine. In such abnormality diagnosis systems, various sensors, for example, detecting sensors for detecting stator currents, detecting sensors for detecting temperature of the rotating electrical machine, detecting sensors for detecting stator voltages, detecting sensors for detecting a rotational speed of the rotating electrical machine, detecting sensors for detecting a remaining electric charge of the battery for supplying electric power to the rotating electrical machine, detecting sensors for detecting an ignition key-off signal, detecting sensors for detecting a starting operation of the engine, detecting sensors for detecting an ignition operation, detecting sensors for detecting an ON/OFF operation of an ignition circuit breaker and the like, are connected to the rotating electrical machine. The outputs of the detecting sensors are accumulated in an operation device for the rotating electrical machine, and a rate of change in the output of each detecting sensor with respect to time is computed, and the change in rate of the output for a predetermined period of time is computed. If the change in the rate of the output for a predetermined period of time is larger than or equal to a predetermined threshold value, it is determined that an abnormality has occurred in the rotating electrical machine. In such conventional abnormality diagnosis systems, however, if an abnormality occurs only in a stator winding of the rotating electrical machine, the rate of change in the output of the detecting sensor for detecting the stator current is not increased, and it is difficult to determine whether an abnormality has occurred only in the stator winding or whether an abnormality has occurred in the rotating electrical machine.Q: Error while installing fbchat-edge on a fresh android application I am trying to develop an application that uses fb chat sdk and i am following the Fbchat edge example.
