The files are "d10.bat", "d11.bat" and "d12.bat" If I open "d10.bat" in Batch IDE it opens a copy and I can edit that copy and save it. However, if I open d11.bat and save it, then change the name to "d12.bat" and save it, Batch IDE does not allow me to save. If I try to close the file, Batch IDE crashes. What do I need to change in order for it to allow me to save "d12.bat"? Thanks Windows Vista, 7 and 8 PCCS: Installer ver. 7.0 PCCS: Developer ver. 7.0 PCCS: Solution ver. 1.0 I have the problem that when I run the demo program from the Help>Demo Programs menu on the top right corner of the screen, it shows me a window "PCCS: Installer ver. 7.0" and then the window gets closed. I created a new installation. when I ran the demo program it showed me the same window as above. what do I have to do? I'm having a weird issue here. I've been using Batch IDE for a while now, but this is my first time encountering this issue. All the text is being messed up in the main.bat file that I'm working on, while it displays perfectly in the.cmd files that I've been editing. The Windows explorer, notepad and wordpad don't display any problems. Also, I can still copy the file and paste it back into my.bat file. I've attached an image of 77a5ca646e
