so you can assume it's an established program that works very well for the vast majority of its user base. It focuses on the creation of high-end publication-quality graphics using high-end graphics hardware and high-end applications. It's a popular, easy-to-use application that's been specially designed to suit current trends and demonstrate your ideas. Its advantages include an amazing ability to create professional-quality graphics — those that use crisp, well-defined shapes with clean edges and vibrant colors — and the use of such industry-standard applications as AutoCAD, InDesign, and Adobe Illustrator. You can share files with friends, employees, colleagues, and clients easily. Adobe's partnership with Corel enables users to get support and resources from a veteran industry partner that can help with software updates and technical problems. ## Photoshop Elements If you're new to Photoshop, Elements

([www.adobe.com/products/photoshopelements.html](http://www.adobe.com/products/photoshopelements.html)) is a great choice because you don't have to invest in expensive hardware or pay the hefty license fees for Photoshop. You can

Q: Delete all files in one directory and its sub directories with one command I have the below command, it is not deleting the files after this and I don't want this behavior at all. find /home/user/devel/repo/src -type f -delete I want it to delete everything and drop the process to finish. How can I do that?

A: You may simply need to use `-exec rm { } \;` to delete everything in `/home/user/devel/repo/src -type f`. `/* *`

**Q:** No error when assigning a const variable of non-pointer type I have a value with the type of const char \* which I want to assign to a const variable of type const unsigned char[]. I

---

could assign the `const char *` directly to the `const unsigned char[]` without getting any error. When I do assign the `const char *` to the `const unsigned char[]`, there is no error. The value gets copied properly. Why is this? Why can I assign the `const char *` directly to the `const unsigned char[]` and not to the `const` variable? Here is the code: `#include #include using namespace std; int main() { const char *c = "String"; const unsigned char [4] str = "Hello World!"; const unsigned char **temp = &str; *temp = c; cout` Is PGD Clinics in Ireland Right for You? Two things are essential for a family to determine if PGD is the right procedure for them. Firstly, they need to consider if their current situation suits their requirements. Secondly, they need to find an IVF clinic that will suit them. At Foetal Development Clinics, all our clinics are based in Dublin city and we have the most advanced fertility clinic. We are one of the few clinics that use the CellSeed® low-risk embryo transfer method and the Ovo
