Kallio Kallio is the name of a district in the city of Helsinki, Finland, with a population of 6,099 in 2012. Kallio is also the name of a ward with 18,717 inhabitants in the Helsingin kaupungin kunta, the administrative county of Greater Helsinki, while the subdistrict of Kallio is Kallio-Seurasaari in the Hämeenkyrö municipality. Kallio is considered to be the heart of Helsinki and its urban core, as it is the closest to Helsinki Central railway station. The neighborhood is also one of the most affluent in Helsinki with an average family income of almost 10,000 Euro. The borough is situated in the city centre in the urban area, just south of City Hall. The most famous feature of Kallio is the Church of St. John the Baptist, the Russian Church. A narrow 1.6 km-long tram-line runs the length of the ward. The tram-line reached Kallio in 1904 and even today, the station situated in the southern part of the district, remains the most important railway station of the Helsinki metropolitan area. The main thoroughfare of the center of Kallio is Kalliopistori Street, which goes through the district and is home to a number of the city's notable buildings. The area surrounding the Tram-line is home to an array of cafes and restaurants, a few of which are internationally renowned. Kallio and the adjacent districts of Hämeenkyrö, Seurasaari and Ida-Virrat are often cited as the most expensive places to live in Helsinki. History Early history The oldest known, as well as documented, cultural heritage that exists within Kallio is an oak tree grove that lay on the shore of Lake Särö on the land of the present St. John the Baptist Church. The oldest willow trees were found in the only remaining part of the grove at the time of its rediscovery in the 1970s. In the 1700s the grove of oaks was moved from the shore of the lake to its present location. Kallio was originally named Seurasaari, a fishing village on the shores of Lake Särö. After 1800, the area became a bustling market town, and after the Russian Empire built a coastal port of Helsingfors

Gate. And so it began with an early-morning idly cruising down the interstate, cheap clothing, cheap beer, and a cheap voice in my cheap head shouting, "Well, this can't be much of a problem then." Within a few miles I learned that it was. I doubt it will be what killed him. It is part of the problem. I doubt it will be what killed him. I doubt, in fact, that what killed him was "the problem." I doubt that the problem was my error. I am a good rider. I did everything that a good rider has a right to do. I was wearing my safety gear, I was wearing my helmet, I was keeping a clear head, and I wasn't riding faster than the traffic. I looked where I was supposed to look. I listened to the warnings I should have paid attention to. I respected the rules of the road, and I paid attention to the people ahead of me. The problem: I was riding too close to the other car in the lane to my left, to the car in front of me, to the car in the lane behind me. My problem: I was a slow learner. I wasn't watching the right things I needed to watch. I was willing to accept the inevitability of the situation, but I shouldn't have expected the same (with) other drivers. I was not paying attention. Being a slow learner is just a part of being a human being. We are all slow learners, in one way or another, to some degree or another. I am not sure that being a slow learner is a bad thing, really. On the other hand, it may lead to more of our social problems. Slow learning has led to many of the world's ills, from wars to racial inequality. I'm not sure if being a slow learner is a good thing, but it sure is one of the difficulties that we all face every day. Last Saturday afternoon, I was riding in a group of about 10 riders on a road that runs along a river. As we were riding, we
