computer via Windows Media Player. It's a valuable tool when organizing music and finding your music. AudioIndex is an easy to use music collection organizer. This tool is extremely useful for organizing music, finding songs and saving time searching for music. AudioIndex indexes the music for quick access to all music on your computer and Windows Media Player. You can display and search for many types of music. AudioIndex can be used as a music collection organizer.

AudioIndex also indexes your computer files to make them findable

---

and searchable. AudioIndex does not modify or delete your computer files. All it does is create indexes for your computer files, a special type of file that other programs like Media Player can search. Features:

AudioIndex scans your music, photos, and video. AudioIndex can index all your WMP music and any music stored in your Computer. AudioIndex can also create an Index of music from a removable media. This includes a USB or Floppy Drive and an Audio CD. It will also scan your folders, and subfolders. AudioIndex is very fast. AudioIndex

---

uses less than 15% of your CPU, and it does not affect the speed of your PC. AudioIndex has a Clean Interface. The interface is intuitive, simple, and minimal. AudioIndex works very well with Windows Media Player. You can easily select a music file, and search for a specific song or album. AudioIndex has a good Support Community with many successful users. Support is open Monday through Friday from 0900 to 1800 PST. AudioIndex has a friendly and helpful help community. If you have a question or a problem with AudioIndex, chances are there is

---

someone in the community who can help you. • AudioIndex is built to do one thing and do it well: Find your music. • AudioIndex indexes the music files on your PC. It does not change or delete the music files. It just creates a database of the music files. Other programs, like Windows Media Player, can access this database and play the music files. You can also search the AudioIndex

Testosterone effects on cultured swine seminiferous tubules: an in vitro model of spermatogenesis. The purpose of this study was to determine if selected androgens (testosterone, 17 beta-estradiol, hydrocortisone, 5 alpha-dihydrotestosterone) influence the development of a seminiferous tubule culture system. Porcine seminiferous

---

tubules from 13- to 14-week-old pigs were maintained for 5 days in organ culture, and effects of androgens were determined by histologic evaluation and tubular protein determination. Qualitative histologic evaluation demonstrated that seminiferous tubules were still in the spermatogenic process, but the stage-specific morphology of each tubule was no longer present. Furthermore, seminiferous tubule protein concentrations were undetectable. Moreover, androgen treatment failed to affect any parameter of seminiferous tubule cell function as

---

assessed by measurements of lipid peroxide levels, lysosomal hydrolase activities, and granulocyte peroxidase generation. The results of this study indicate that the seminiferous tubule organ culture system is a useful tool for studying the effects of hormones on spermatogenesis, but that testosterone, 17 beta-estradiol, or hydrocortisone does not improve either elongation or differentiation of the seminiferous epithelium. Tune Me is a music app that helps you search local music, and store your searches in a database. The app also has a built-in social media sharing feature to connect with friends, and even compete with them to add the most local songs to your collection. It's a free download from the iTunes App

---

Store, but the company is also offering a Free and Premium version of the app. Creating a database When you open the app, you're asked to select your current location. After you're done, you can add more locations by pressing the plus sign. It's recommended to do this only once in each instance. You can also create a list of any type of song. Finally, you can scroll through all the songs by tapping and swiping on the screen. Viewing the database You don't have to save the album list you create. In fact, it's not even required. All you need to do is open the

---

database in the app, and press the use button to upload your collection. Your music library can then be viewed like a traditional music player, and songs can be added or removed from the database. The app also lets you
