Included Files: You are granted a free license for Timestomp-GUI for trial use. You can choose between purchasing a license for Timestomp-GUI or just use the trial version. Download What is new in this version: * No visual changes. * On Windows only, no need to buy or download any other software. This is the portable counterpart of Timestomp-GUI. As the name suggests, it is a graphical interface for the Timestomp command-line application, which enables users to seamlessly change time attributes for files. Since installation is not a prerequisite, you can drop the executable file anywhere on the hard disk and just click it to run. It is also possible to save Timestomp-GUI to a USB flash disk or similar storage unit, in order to run it on any machine directly. An important aspect to take into account is that the Windows registry is not updated with new keys, and no files are created on the disk by the app, leaving it clean after removal. The interface is made from a regular window with a clean and intuitive structure, where you can point out the Timestomp location and file whose attributes you want to change by using the file browser. Drag-and-drop is not supported. Batch processing is possible, meaning that you can alter time attributes for multiple items at once, by including an entire folder in the task. So, you can select between changing the time for last modification, access or creation, or modify everything. Timestomp-GUI also integrates an option that lets you change a file's attributes by making them equal to the ones of another file from the hard drive. Modifications are applied with the click of a button. The program runs on a very low amount of CPU and RAM, and carries out tasks quickly and effortlessly. We have not come across any kind of issues in our tests, since the tool did not hang, crash or pop up error dialogs. All in all, Timestomp-GUI should meet the requirements of users looking to seamlessly modify time attributes for files. Requirements: * Windows 2000, XP, Vista and Windows 7 File size: 21.2 MB Download: Details What is new in this version: * No visual changes. * On Windows only, no need to buy or download any other software. To report the results of combined phacoemulsification and toric intraocular lens (IOL) implantation in patients younger than 40 years with adequate capsular support. Private practice, Karolinska University Hospital, Stockholm, Sweden. Prospective case series. Patients were treated with combined phacoemulsification and IOL implantation. The cataract extraction and IOL implantation were performed via a small incision with a 5.5 mm surgical system. The postoperative follow-up was 1 month. Twelve eyes of 10 patients were included. The mean age was 26.0 +/- 5.3 years (SD). Seven (58%) of the 12 eyes were operated on for traumatic cataract and 5 (42%) eyes for cataract extraction with aphakia in the fellow eye. The mean postoperative refractive correction was +0.03 +/- 0.21 diopter (D) (range -0.50 to +0.75 D). No patient had a major complication. One patient had a scintillating scotoma due to undetected chronic subcapsular cataract with movement of IOL, which was successfully treated by Nd:YAG laser capsulotomy 3 months later. Combined phacoemulsification and IOL implantation can be performed safely and effectively in young patients with adequate capsular support. No intraoperative complications occurred. The vision outcome was excellent. The major complication was a patient who experienced postoperative scotoma due to chronic subcapsular cataract with movement of the IOL.PARIS (Reuters) - France's Prime Minister Edouard Philippe has warned against an "incendiary" debate over the country's National Front party at home or in the European Parliament, four days after a lawmaker made anti-Semitic remarks. Slideshow (2 images) "I am worried about an incendiary political debate that leads to intolerance and doubt," Philippe told the news website Mediapart, on Friday. Philippe was referring to comments made by FN leader Marine Le Pen last

Computer Linux offers a different way to manage time and date modification, due to the portability of the system, mainly, this is a problem in the Unix-based operating system, because as many users know, even though you can modify the clock in those systems, you can not get this done. Time Information Agent (TIA) software is a Linux distribution developed specifically to solve this problem. The TIA software is a free, open source, portable, cross-platform application, and it contains several functions to solve the problem. It is organized as a small and clean installation which does not require any installation or setup. For ease of use, the application does not allow to unzip or install in the wrong directories. You can forget about the installation process completely, unless you want to select, for example, a new installation directory. The TIA software will only be installed at the beginning of the installation process. It will be installed in just one directory, and it will be made with a clean, intuitive, simple and easy-to-use interface. TIA can display the information of the computer clock
